가상 개인 미션 과정

Education: 280 · Break: 20 · Separate test : 0 · Total: 300

1 / Guidance · 10min

Class Design LAB / Timetable and progress plan

Teacher Guidance: Today, the student chooses the job and task themselves.

Student Behavior: Choose today's goal and necessary help.

Submission: My goal

Confirm Completion: Select goal and help

Alternatives when blocked: Start with interest exploration if there is no result paper.

1 / Result Interpretation · 25min

Result Sheet / Student Result Summary

Teacher Guidance: Your scores and types are interpretation of the original and are not job limitations.

Student Behavior: Check score scale and compare TOP5 original rank with your interests.

Submission: Interest Job and Questions

Confirm Completion: Distinction between test and self-statement

Alternatives when blocked: Do not estimate score or type if there is no original.

Link: Revision Time: Nov 7, 2026, 3:36 PM · UTC

1 / Basic Planner Practice · 15min

Planner / Personal worksheet · Planner card

Teacher Guidance: Let's plan, execute, and record one small actual behavior.

Student Behavior: Perform one material preparation or seat cleanup for 3 minutes and write down actual behavior.

Submission: Basic usage practice record

Confirm Completion: Separate record of planned and actual actions

Alternatives when blocked: If not linked, use paper or local records.

1 / LAB Exploration · 35min

Career Exploration LAB / Corporate/Job LAB / Corporate/Job material / Field operation

Teacher Guidance: Corporate research is the student LAB's role. Record sources and required actions.

Student Behavior: Student selects the job, question, task, reason, and source to explore today.

Submission: Exploration Record

Confirm Completion: Allowed with reasons for interest outside of TOP5

Alternatives when blocked: If no official material, mark as general job practice.

Link: Revision Time: Nov 7, 2026, 3:36 PM · UTC

1 / Select and Register Job Activity Card · 15min

Class Design LAB / Planner / Field Operation

Teacher Guidance: Compare candidates and personally modify the goal and first action.

Student Behavior: Select candidates matching remaining time and tools, check scope, and add.

Submission: Confirmed Individual Activity Card

Confirm Completion: Student selection/ Scope confirmation/Registration status confirmation

Alternatives when blocked: Send materials

1 / Select and Register Job Activity Card · 15min ↳

with lack of content or out of range to teacher review pending.

Continued 4/13

Link: Revision Time: Nov 7, 2026, 3:36 PM · UTC

1 / Actual performance/record · 35min

Planner / Field Operation

Teacher Guidance: Actual behavior and results are required, not just the finish button.

Student Behavior: Perform mock or actual activities and record actions, results, changed methods, and retrospection.

Submission: Execution records and deliverables

Confirm Completion: Distinguish between mock tasks and actual experience

Alternatives when blocked: Preserve partial performance and request help.

1 / Break · 20min

/

Teacher Guidance: Break time is distinguished from education time.

Student Behavior: Rest and prepare the next material.

Submission:

Confirm Completion: Confirm total including breaks

Alternatives when blocked: Ensure it does not overlap with consultation appointments

.

1 / Experience Verification · 10min

In 수업설계LAB, open Writing and consultation, then the optional experience helper. No external AI writing app is connected. / Field Operation / Self-Intro · Consultation

Teacher Guidance: Only verified actions, results, and learned points can be used in the text.

The teacher opens a fictional performance record and demonstrates: choose one experience, leave situation and role blank if you like, view one question at a time, skip the help and write the text directly. Notes are never inserted automatically.

1 / Experience Verification · 10min ↳

Teacher question: Which organization, project, and period was it? / What was your responsibility and target? / What specific action of yours matches the required behavior? / What result can you state with numbers or facts? / What learning can you reuse in this role? / What source or proof can be verified?

Student Behavior: Select actual facts to utilize and have the student verify them personally.

Within the allotted writing time: choose an experience → optional notes (situation and role can be skipped) → write the text

1 / Experience Verification · 10min ↳
yourself → check your own action, result and evidence → save V1 or a revision. No extra minutes are added.
Read the role's required behaviors and pick ones that match what you really did.
Fictional example: a student who prioritized mock customer requests in class notes role and goal, action, observed result and limits. It was a classroom simulation, not a real company commission. Examples never fill your notes
.
Submission: Verified Experience
Performance notes tied to job requirements
1 / Experience Verification · 10min ↳
, with evidence
Confirm Completion: Action/Result/Learned points/Student confirmation
Alternatives when blocked: Add existing real-world experience, but exclude hypothetical answers.
Counselors only ask fact-check questions and never compose sentences for you.
You can write freely without this help

1 / V1 Drafting · 35min

In 수업설계LAB, open Writing and consultation, then the optional experience helper. No external AI writing app is connected. / Personal Statement/Consultation

Teacher Guidance: In a non-AI connected state, manual entry and rule-based questions are used.

The teacher opens a fictional performance record and demonstrates: choose one experience, leave situation and role blank if you like, view one question at a time, skip the help and write the text directly. Notes are never inserted automatically.

Teacher question: Which organization,

1 / V1 Drafting · 35min ↳

project, and period was it? / What was your responsibility and target? / What specific action of yours matches the required behavior? / What result can you state with numbers or facts? / What learning can you reuse in this role? / What source or proof can be verified?

Student Behavior: Select item, job, length , and confirmed facts to write V1, check, revise, and save V2.

Within the allotted writing time: choose an experience → optional notes (situation and role can be skipped) → write the text yourself → check your own action, result

1 / V1 Drafting · 35min ↳
and evidence → save V1 or a revision. No extra minutes are added.
Read the role's required behaviors and pick ones that match what you really did.
Fictional example: a student who prioritized mock customer requests in class notes role and goal, action, observed result and limits. It was a classroom simulation, not a real company commission. Examples never fill your notes .
Submission: V1·V2 and Checklist
Performance notes tied to job requirements , with evidence

1 / V1 Drafting · 35min ↳
Confirm Completion: Preserve student original text/Fact verification/Student review/Save
Alternatives when blocked: Can proceed with self/peer check, not all-hands individual consultation.
Counselors only ask fact-check questions and never compose sentences for you.
You can write freely without this help

1 / Consultation cycle · 60min

In 수업설계LAB, open Writing and consultation, then the optional experience helper. No external AI writing app is connected. / Personal Statement/Consultation

Teacher Guidance: Reserved students have consultations, waiting students prepare questions/evidence, finished students revise.

The teacher opens a fictional performance record and demonstrates: choose one experience, leave situation and role blank if you like, view one question at a time, skip the help and write the text directly. Notes are never inserted automatically.

1 / Consultation cycle · 60min ↳

Teacher question: Which organization, project, and period was it? / What was your responsibility and target? / What specific action of yours matches the required behavior? / What result can you state with numbers or facts? / What learning can you reuse in this role? / What source or proof can be verified?

Student Behavior: Specify actual actions of shared V1 and verify additional facts. V1 is kept as is → only what the student chose is shared → consultation questions → the student confirms or excludes any additional facts → the student revises →
